## Latest Experience

### Severn Trent Water

September 2018 – Present

#### Business Leadership Programme

The Severn Trent Business Leadership Programme consists of three 9 months placements to get an exposure to different business areas and prepare graduates to take on Business Lead roles:

#### Senior Network Technician / Catchment Lead

March 2020 – Present

As a Catchment Lead, I am responsible for the South Birmingham region, working with our contractor, Amey, to ensure that we meet our ODI metrics for pollutions, flooding and blockages. I am also regularly liaising with our customers following complaints and escalations to ensure that issues are resolved and working with Solihull Council as a member of the Flood Risk Management group to proactively identify hot spots and ensure collaboration to reduce flood risk.

I am also a measure owner for repeat flooding incidents where we are proactively identifying true root causes to improve our ODI performance. As a result, our First Time Resolution compliance have increased from c.50% to 85%+, meeting our target and we are currently developing a new process for civil works to reduce Follow on Work issues.

#### Compliance Project Manager

June 2019 – March 2020

As a Compliance Project Manager, I was part of a team overseeing a £60m+ investment pot to ensure that our operational sites are meeting all regulatory requirements.

My role was to transfer the project into Business as Usual (BAU) which included an asset verification process, working with our Asset Data team to ensure that all maintainable equipment is transferred onto our core systems and planned preventative maintenance schedules are in place with our contractors. I have also led the 'Compliance Champions' working group to identify the structure for roles and responsibilities following a reorganisation within Estates Management and oversee the transfer period. I have also line managed two of our Compliance Administrators. Finally, I have developed the tender documents working with our Commercial department for a new Fixed Wire Testing contract to ensure the maintenance of electrical safety on our operational sites.

#### Project Officer – Visitor Experience Team

September 2018 – July 2019

During my first placement in the Visitor Experience Team I was working on two major change projects and a capital expenditure (CAPEX) programme. The first project was the development of a new social media strategy to align our messaging across the portfolio and develop a consistent approach to attract new visitors. As a result, we have achieved a 200%+ increase in engagement which in turn contributed to record visitor numbers and record revenue of £1m+ for the financial year.

The second project was the introduction of a new ANPR parking system at Carsington where I have developed and presented the business case to the Severn Trent Executive Committee and managed the tendering process.

As part of the management of our CAPEX programme I have developed a new tracker to better visualise progress and liaised with Site Supervisors and contractors to deliver the programme within the required time and budget and to the expected quality.

## Other Relevant Experience

### Junior Enterprises Europe

July 2016 – August 2017

#### Director of Finance & Private Cooperation

At JE Europe, I was on a one-year mandate working in the Executive Board of the organisation, influencing policy making and acquiring partnerships for our network of 280 Junior Enterprises in 14 countries with 22.000 students. My main responsibility was to work together with our corporate partners, e.g. Microsoft, Simon Kucher & Partners and Covestro as well as to find new partnership opportunities and to join into the policy making process of the European Commission, for example by being part of the Pact4Youth and lobbying decision makers on high impact events such as the EPC 20<sup>th</sup> Anniversary Conference. I was personally responsible to find sponsors for our annual Spring Conference and fundraised €26.5k for the event (the highest ever amount fundraised), and for writing the application for an operational grant under Erasmus+ KA3, where acquired €35k (the highest ever amount in operational grants). I have also line managed two other members of the PC team.

## Education

### University of Birmingham

February 2021 – August 2021

#### Full-stack web development bootcamp

##### Example Projects:

- 1., Geo Link - a tool to reconnect with your city | Languages used: JavaScript, jQuery, HTML, CSS, Foundation, Git | URL: <http://krisztianivan.com>
